

* Available exclusively with CenterEdge Payments

NOW OFFERING:

Click To Pay

Convenient for Guests. Easy for Your Team.

Take payments for events, accounts receivable, and dining, easily and more secure than ever.

CenterEdge's Click To Pay Feature Set

CenterEdge's Click To Pay feature allows you to take event deposits and payments more securely and conveniently than ever. Rather than taking guests' credit card information over the phone or asking guests to come in to make payments, simply send a deposit request link via email or text.

Guests visit a secure payment portal, enter their credit card information, and that's it! Future payments can be applied to the same card on file, or a new link can be sent as desired. No more taking credit card payments over the phone or waiting on deposits to come in person, just a simple, secure way for you to book an event and get back to selling.

Turn Tables Faster with Pay at the Table

Click To Pay's Pay at the Table feature allows you to turn tables faster while giving guests more control over their buying experience. Print restaurant and dining checks with a QR Code and custom message and provide guests with the self-service options independent guests prefer. As items are added before checkout, check totals are automatically updated, leaving no room for mistakes and saving staff time reprinting and dropping new checks.

Stop Waiting for Checks in The Mail

Streamline accounts receivable payments for your business and the organizations you serve. Rather than calling account representatives or waiting on checks to arrive, accounting staff can easily send outstanding invoices followed by payment request links so your clients can pay their balances from anywhere.

When Combined with CE Advantage & CE Payments, Click To Pay Users Benefit From:

- A fully integrated events platform, with advanced scheduling, package customization options, and eCommerce
- The ability to tokenize payment information collected for future payments and gratuities
- A secure link payment option for Accounts Receivable for team members, schools and organizations
- A single solution for your events, food and beverage, and credit card payment processing needs
- Access to the Pay at the Table feature which allow you to print QR codes and custom text on dining checks so guests can scan and pay at their convenience
- Faster table turns, more peace of mind due to enhanced security, and happier guests who have more control over their payment experience

* Click to Pay is available exclusively with CenterEdge Payments. Additional program fees apply.

About CenterEdge Payments

CenterEdge Payments is a transparent and simplified credit card processing solution for the family and location-based entertainment center, water park, amusement park, and specialty attraction industry. With consistent, clear, and concise pricing, and integration with the CenterEdge Advantage Suite of software, CenterEdge Payments offers value through our educated team members, low-cost approach, and by serving as a single source of contact for software and payments-related issues.

- Designed for the entertainment and amusement industry
- All-in-one payments and POS software provider
- Support available when you need it most
- Single company for both your payments and software needs
- Transparent approach to pricing with no outlandish fees or rate creep
